

Single Sign On (SSO) Set Up

Single Sign On is currently enabled for your company to access Policy Center.

During your company's Policy Center migration, we will work with your Information Technology point of contact to set up SSO for the New Policy Center Platform. From the 2 choices below, please identify your company's SSO set up preference for the New Policy Center Platform.

- ☐ New SSO (Preferred. Advance Set Up): We will send a new SSO Form to your Information Technology point of contact to complete. This setup requires your company's participation to test the SSO in advance of the migration, and ensures that the SSO works prior to the migration day.
- ☐ Existing SSO (Migration Day Set Up): This setup requires your company to update the existing SSO configuration on the migration day. Any issues encountered with this SSO set up on migration day may delay user access to the new Policy Center platform .

Information Technology point of contact Name, Email & Telephone
